Empowering Foster Caregivers and Helping Kids Age Out Successfully

Foster families and caregivers play a critical role in providing children with stability, healing, and life lessons. As such, they make important, life-changing decisions each day and must have access to relevant data about a child – wherever their day may take them.

And as foster youth transition out of care, many aren't prepared to make it on their own.

To address these challenges, EastBanc Technologies developed the iSee Suite. Based on our powerful proprietary iSee platform, these mobile applications provide access to essential tools and resources that empower caregivers while connecting youth to an environment of encouragement and opportunity.

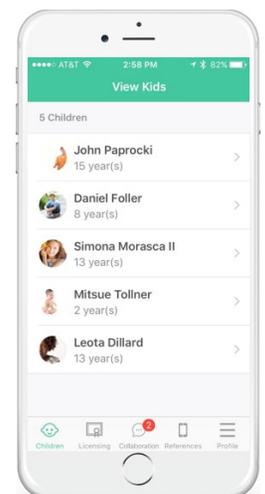

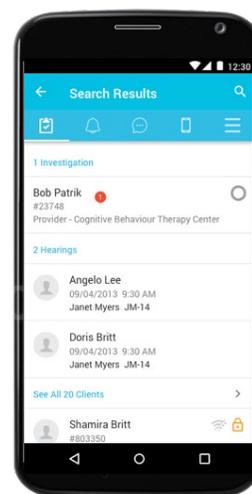

Available for any device or platform (Android, iOS, Windows, Kindle Fire) the iSee Suite includes:

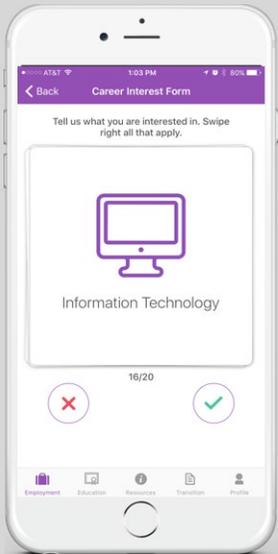

- **iSee Caseworkers** – Providing caseworkers with secure, 24x7 access to a mobilized case management system.
- **iSee Parents** – Delivering foster parents secure access to critical information on their kids at their finger tip.

- **iSee Youth** – Cool, fun, and easy-to-use, iSee Youth gives current and former foster youth access to a lifeline of tools, resources, and support.

iSee Caseworkers – Mobilize your Case Management System. Keeping good tabs on data is key for any human services organization that wants to be successful.

iSee Foster Care helps by streamlining the availability of critical, yet disparate case information through secure, mobilized self-service tools – all in real-time. With a swipe of the finger, caseworkers can access up-to-the minute information about each case.

Using your organization's API, iSee draws on data from a broad spectrum of sources, including medical, law enforcement, and school records, providing secure access to up-to-the-minute data from any device or platform. iSee also supports data-entry in the field and instant synchronization with your case SACWIS or CCWIS system.

iSee Parents – Help is Just a Swipe Away

With iSee Parents, foster families can quickly and conveniently access information about children in their care right from their mobile device. Engineered with security optimized for mobile devices, foster parents only have access to the data appropriate to them such as medications, court dates, Medicaid, and contact lists. The app also includes a licensing checklist with push notifications for important alerts. When support is needed, foster parents can chat directly with case workers via instant messaging.

iSee Youth - Helping Foster Youth Transition to Adulthood

The iSee Youth mobile application connects foster youth to the critical support and social networks they need to thrive into adulthood.

An essential guide to adulthood, the app helps youth quickly and easily find information that empowers them to make their own decisions and take responsibility for their actions. No need to search public websites or sift through transition binders, the app integrates it all in one interface, that's always up-to-date. With easy-to-follow explanations, suggestions, checklists, and one-click links, the app is a go-to resource for transitioning foster youth.

Features include quick access and smart navigation that utilize tools that kids love. From information on life outside foster care, such as job searches, training, housing information, and more, to storing important information such as birth certificates, Medicaid, and transit smartcard data – everything is right at their fingertips.
